

18. (Twice Amended) A force sensor comprising:

C/  
a sensor and a moving arm force responder, and  
wherein:

5

said moving arm force responder comprises a base  
having a first member adapted to receive a first force,

said first force defines a first direction,

10

said moving arm force responder also comprises  
precisely two arms each extending from said base parallel to said first  
direction,

15

said base is adapted to respond to said first force by  
flexing,

said flexing causes said base to urge said arms to  
move relative to each other, and

20

said sensor is responsive to said arms by generating  
an electric signal indicating said first force.
